

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

Bigelow (N. Y.). The Council will publish *The Nature-Study Review* (sample copy free) as the official organ, and send it free to members whose annual dues (\$1.00) are paid in advance. Teachers and others interested in any phase of studies of nature in schools, are invited to send applications for membership to Secretary, A.N.S.S., Teachers College, New York.

FIELD NOTES.

ANOTHER GREAT BLACK-BACKED GULL FOR OHIO.—Records of this Gull (*Larus marinus*) are so unusual in the state that their publication is worth while. Professor J. S. Hine reports the capture of a female on the State University grounds, on the Olentangy river, December 16, 1907. All records thus far have been winter records. It is a little strange that specimens have not been found along the lake border as well as inland.

LYNDS JONES.

ANOTHER BRUNNICH'S MURRE RECORD FOR OHIO.—On about the 22nd of December, 1907, a fine specimen of Brunnich's Murre (*Uria lomvia*) was brought to me. It was taken alive a few days before near Jefferson, Ashtabula county, Ohio. This is the first one which has come into my possession since December, 1896. The bird was in excellent winter plumage, but rather thin in flesh.

ROBERT J. SIM, *Jefferson, Ohio.*

(A wing of this species was found on the beach of the Cedar Point Sand Spit by the writer late in December, but no birds have been seen nor any others reported from this side of Lake Erie. Reports from the Canada side from Mr. P. A. Taverner state that the birds appeared in that vicinity, but were starved before the middle of January. These reports indicate another flight of less extent than the one of 1896.—Ed.)

THE BOHEMIAN WAXWING AT GLEN ELLYN, ILL.—The appearance here on January 22, 1908, of the Bohemian Waxwing (*Ampelis garrulus*) adds another interesting bird to the Glen Ellyn list, and making, as far as I am aware of, the original records for the county as well. An irregular winter visitor to this corner of the state, it has been reported and taken on more than one occasion at several points along the shores of Lake Michigan, years, however, usually elapsing between such records. My bird was in a flock of Cedar Waxwings found feeding on the decayed and yet persistent fruit of the apple on our place, and which presented in their actions a most animated sight.
